

Congratulatory Message

Mr William C L Hui

Director, Sze Cheong Investment Company Limited, and Director, Central Development Limited

Allow me to join the chorus of congratulations on the Platinum Jubilee of the founding of the Faculty of Science, The University of Hong Kong.

Over the past 70 years, the Faculty has played a pivotal role in advancing the frontiers of science research and education. It has nurtured a vast pool of professionals in various disciplines, and has been the breeding pond for leading scientists and community leaders. It is indeed a time to celebrate the remarkable achievements of the Faculty.

I am exceptionally glad to witness the opening of the Stephen Hui Geological Museum at the launch of the celebration year. It is so gratifying to see my late father's wish comes true. I hope it can help the Faculty to arouse public interests in science and discovery.

My best wishes for a wonderful celebration and a very successful anniversary year.
